

The Two Year Plan

Plan 2025 focuses on agrarian development, development of the communes, and military fortification.

Agrarian Development

By March of 2025 Redwood Commune is to have established holdings in the Rockfin Fishing District as well as completed Meitzen Garden.

Fort Tenayuca

Fort Tenayuca Must be Completed by December 21st 2025 to commemorate Emma Tenayuca and her struggle for workers' rights in Texas.

The Commune

The Redwood Commune is the current governing body of the Socialist Republic of Texas. It is made up of the Redwood community and the Communal Representative DJR. The Communal Representative can be impeached by a vote of over fifty percent. Voting is by show of hands due to the state being only one commune.

Confederation of Communes

With the establishment of more than one commune an official government will form as a Confederation of Communes, Communes will hold national assemblies where they will get together and decide on government policies. The Communes must obey the constitution or the government will be forced to take the appropriate measures.

The Communal Act

As The Socialist Republic of Texas develops into a state, Communal-Worker Councils will be implemented. Communal-Worker Councils will empower communities and workers to have a say in local and national policies. Communal-Worker Councils are councils made up of two sections: communities and workers councils. The workers councils are made to address workplace issues while communal councils are to address issues within the community and the state. The communes participate in elections and social issues; workers' councils are to ensure workplace democracy, aid in community planning, and cooperate with the community and the government.
