

Åland Space Technological Administration (ÅSTA)

The ÅSTA will be founded to work on researching space and allowing the Åland State to reach space. The ÅSTA will be state owned. ÅSTA's budget will be decided by the parliament. ÅSTA will have an administrator. The administrator hires people to work at ÅSTA and can work if qualified to. ÅSTA will be divided into the Observational Branch, Research Branch and Engineering Branch. The Observational Branch will observe stars, planets, moons and other celestial bodies/events. The Research Branch will research the technology needed and how to make it like rockets. The Engineering Branch will build and make everything needed to launch rockets.

President of the State of Åland *Axel Himberg*
