

1st Constitutional Ammendment of the Republic of Sprachenland

As of now, the government will be skillocratic-based, meaning individuals are legally and professionally judged based on skill, knowledge and experience rather than by an individual's biological age. And for the official voting age, I hereby declare that it will be 13. The primary purpose of **Skillocracy** is to give younger individuals (primarily teens/young adults) more rights and abilities within a nation's government.

A handwritten signature in black ink, appearing to read "Moutz", written over a horizontal line.
