

Creating your own micro-nation or family clan-nation-tribe!

Follow these seven simple steps and you too can have your very own micro-nation.

1. Have a Reason. ...
2. Acquire Some Land or a property exclusively yours ex. Car, Rug, Jar of Dirt. ...
3. Form a Government and Draft a Constitution. ...
4. Acquire Some Citizens. Can be just you.....
5. Set Up Your Economy. ...
6. Brand Your Micro-nation. ...
7. Be Ready to Defend Your Country.

Work to meet the requirements of statehood / get recognized. If you're hoping to secede from your parent nation, you'll need to meet specific statehood requirements. The Montevideo Convention of 1933 defines the four requirements of statehood: you must have a defined territory, a government, a permanent population, and the ability to enter foreign relations.[\[6\]](#)

- When you meet these requirements, you'll have a sovereign nation, but you're still considered a micro-nation until another country officially recognizes you.

LETS GET STARTED!!!

Sit down and think of a name your nation should be called something right? It can be a variation of your last name which is your tribe, nation and or clan name. As such you are already the leader of this but you were never informed of this birth right so now you'll be reclaiming it and no you don't have to have been born here. There is nothing illegal about this and there are no laws against it, however the big guys (World Nations) turn their backs on us but don't deny we can do it too form our own nation of nations.

Start up the computer and on the top label it "Declaration of _____ Nation" or something similar after this place an established date usually today's date. The next steps will include creating a boundary as you must now declare where its located and what physical or internet domain is yours in which you rule as just leader!

Now decide what currency your country issues as well as do you trade, barter or accept foreign currencies. Keep in mind most things are up to you but these basic's are required in order to be considered a legit nation.

Next the nation structure is it a king queen, monarchy or etc you decide! As well its time to label yourself as what leader, potentate and those who live there or agree to be a part of your nations founding. Each person should be given a title or position as nationals or citizens etc.

Do you offer any holidays, fairs, attractions, history of your family?

Now your brand...do you have a logo or family flag or crest? If not google your last name and use those coats of arms or search royalty free images flags or logos and select one. This should be placed on your

letter head, outgoing mail, and especially the declaration. It would be ideal to also get a real flag made and put on your house and or a notice of non-us property no trespass signage (3) is best. This can be done by buying a property sign from www.blacksite32.com and getting it made at www.builddesign.com.

As for your new nations national security and recognition it is best to be recognized by another nation. Most large nations will not enter into this agreement, however any other nation can recognize you giving your nation allies and standing. Just as the large nations back each other we small nations back each other and form our republic like having a witness in court. If you can not find another nation to join in a neutral alliance www.blacksite32.com micro nation package will do so for a small file processing fee. This file should be included with this file so the purchaser is in good standing.

You are nearly complete in setting up a nation from here you need to go to the notary and any will do for this process. But you need to get the notary and have them notarize this document.. above the notary section ensure the word JURAT is in place if using the file BADWOLF provides this has been done for you..

Understand that you can be creative in nearly all aspects of this process..some people claim additional territories on mars, stars, antarctic etc but nothing underwater can be claimed or so they say.

Now what will you do with this new empire? Operate it daily or once in a while, let others operate, contact other micro nations in attempts to secure other alliances? Make copies of your declarations store one in a safe place, keep one at the ready and send one to the gov of your state or Dept of State. Remember you don't need their approval nor acceptance so you may or may not get a response and no matter they don't have the jurisdiction to do anything. In your declaration you can mention treaty with the US and the USA or world.. Are your borders open to commerce? Peace treaty with Aliens? Etc. Let your inner thoughts lead the way and enjoy! Welcome to the world of being a leader of a private Nation.

The file below is the basic template for a declaration it is to be modified to suit your needs. So use it as a starting point and add, remove etc

Thank you..

Final Approval:

Once you have done these parts and got the declaration notarized your official in the private and should display a copy of this near your front door inside. Obviously your choice but if any agencies should enter they need to know its private jurisdiction, like this signs or flag out front. Ok so now you should contact Mr. James C Lovett for the official Recognition File of Alliance between your and his nation!
